Installation

The gate valves are designed for a max. differential pressure equal to the permissible operating pressure.

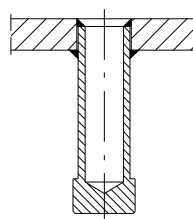

If a bypass line is required or requested for other reasons, a NORI 40 globe valve as per type leaflet 7621.1 should be used as bypass valve, depending on the nominal diameter of the gate valve:

Gate valve	Bypass
DN 150-200	DN 15
DN 250-350	DN 25
DN 400-600	DN 40
DN 700-800	DN 50
